

## The Pride of North Salem!

North Salem residents are drawn to green open spaces. These beneficial environments provide an idyllic and healthy home for all. The care you put into your land contributes to the natural beauty and remarkable topography we are fortunate to experience daily. Thank you!

*Did You Know?* Our extraordinary natural environment, including wetlands and wooded ecosystems:

- ✓ provides us with oxygen
- ✓ removes dangerous carbon from the air
- ✓ prevents erosion and flooding
- ✓ maintains atmospheric temperatures
- ✓ filters and cleans our water
- ✓ is home to millions of plants, animals, and insects that are critical to our existence!

To assist in protecting our natural environment and vital wetlands, North Salem has established guidelines and resources to assist residents. They can be found at <https://www.northsalemny.org/building>

If you are planning any work on your land, please check with the North Salem Building Department at 914-669-5952. We are here to assist. Thank you.
